BeED (Beeducation Adventures Sdn. Bhd.)
HR Team / Jimmy Koay (Co-Founder)
Subang Jaya, Selangor, Malaysia
Re: Application for Senior Software QA Engineer (Automation & AI-Powered Testing)

Application via maukerja.my + email (LinkedIn posting closed)

Dear BeED Hiring Team,

I'm writing to apply for the Senior Software QA Engineer (Automation & AI-Powered Testing) position. I originally saw this role posted on LinkedIn by Jimmy Koay, but the posting is no longer accepting applications there — so I'm applying directly via maukerja.my and email. I'd appreciate the opportunity to be considered for this role, as the JD fits my background almost perfectly.

On EdTech domain — at Ruangguru I architected a low-code test automation platform (Node.js, Playwright, Prisma) adopted by 50+ engineers across QA and product teams, scaling test coverage from 85% to 97% across 1,000+ test cases on a platform serving 53M+ students. This is direct EdTech experience matching BeED's LMS ecosystem, where test plans need to cover learning pathways, assessment flows, and student-facing features at scale.

On AI-powered testing — this is where I'd love to contribute most. I have hands-on experience building RAG pipelines with vector databases (Chroma, Qdrant), custom MCP (Model Context Protocol) servers for tool-using AI agents, multi-agent orchestration, and persistent context and memory systems for AI agents. I host local LLMs via Ollama and MLX for development and evaluation. I can apply this directly to BeED's QA needs: using AI tools to generate/refine test scenarios, develop and repair test scripts, identify defects, and analyze test failures. The JD's emphasis on AI-powered testing is genuinely the kind of work I want to do more of.

On mobile testing — currently at GoPay (GoTo Financial), I own end-to-end quality for the GoPay mobile apps serving 30M+ users across Indonesia, Malaysia, and Singapore. I test across multiple device sizes, screen densities, and OS versions (Android 8-14, iOS 13-17). This maps directly to BeED's mobile experiential learning platform (BeED Journeys).

On seniority and team fit — I'm a former Test Engineer Team Lead at Vidio.com (45M+ MAU streaming platform). I'm comfortable being a senior peer to your existing SDET (Satrio) or taking on mentoring responsibility. I'd be glad to discuss what the team needs most.

On location — I am currently based in Jakarta, Indonesia. I'm open to relocation to Subang Jaya, Malaysia if BeED can support visa sponsorship (Employment Pass), or to a B2B contractor setup where I work remotely from Jakarta. I'm flexible and would be glad to discuss what works for the team.

I have attached my CV. I would welcome the opportunity to discuss how my EdTech experience (Ruangguru 53M+), AI-powered testing skills (RAG, MCP servers), and mobile QA leadership can contribute to BeED's QA team.

Best regards,

Noorman Yulizar Prabowo
