Lokki Henkilöstöpalvelut Oy
Helsinki, Finland

Re: Application for QA Engineer — Banking Sector Project (Ref: 27038535)

Dear Kimmo,

I am writing to apply for the QA Engineer position at Lokki Henkilöstöpalvelut Oy, supporting the modernization of your banking client's mobile and web platforms. With 10 years of professional software testing experience — including direct QA ownership for GoPay (GoTo Financial, 30M+ users) and Bank Indonesia's national QRIS pilot — my background aligns strongly with the project's focus on UI component testing, regression testing, and stability of existing functionality during modernization.

At GoTo Financial, I own end-to-end quality for high-traffic financial features including Wallet Balance, Order History, User Summary, and User Transaction Statement — across Android, iOS, and web platforms. I lead manual exploratory testing and automation coverage, and I drive regression through final release sign-off for GoPay's user base of 30M+ users across Indonesia, Malaysia, and Singapore. This includes non-functional testing (performance, accessibility validation) and ensuring that existing functionality continues to work as new UI components ship — exactly the work pattern described in your assignment brief.

Earlier, as Test Engineer Team Lead at Vidio.com (45M+ MAU, 5M+ paid subscribers), I led a team sustaining 90%+ test coverage across Web, iOS, Android, and Smart TV — including custom-built Python libraries for cross-platform UI component testing where standard tools (Appium, Selenium) offered zero coverage. At Ruangguru, I architected a low-code test automation platform (Node.js, Playwright, Prisma) adopted by 50+ engineers, scaling test coverage from 85% to 97% across 1,000+ test cases.

My banking-sector experience includes core UAT work for Bank Indonesia's internal bank-to-bank transfer infrastructure and the national QRIS pilot — both high-stakes, compliance-critical environments. I am familiar with the discipline required when testing in regulated financial contexts.

Salary expectation: €40–48/hour (based on Finnish market rates for senior QA engineers with banking sector experience). I am open to discussion based on the full package.

I have attached my CV and the answers to the five mandatory questions. I am available to start according to agreement with a 4-week notice period. Thank you for your time and consideration — I would welcome the opportunity to discuss how my background can support your client's modernization project.

Best regards,

Noorman Yulizar Prabowo
