NOORMAN YULIZAR PRABOWO

MOBILE QA TESTER — iOS, Android & Smart TV Specialist

noormanyulizarp@gmail.com | +6289634112503 | linkedin.com/in/noormanyulizarp

PROFILE SUMMARY

Mobile QA Tester with 10 years of professional experience testing applications across iOS, Android, Smart TV, and embedded platforms. Strong track record on streaming apps (Vidio.com, 45M+ MAU, 5M+ paid subscribers) and fintech mobile apps (GoPay, 30M+ users across Indonesia, Malaysia, and Singapore). Architected Indonesia's first internally-controlled TV device farm with custom Python services for infrared sensor control and embedded system automation — solving mobile device testing at scale where Appium and Selenium offered zero coverage.

CORE SKILLS

Mobile Testing: iOS, Android, Smart TV, STB, embedded device testing, device farm automation

Mobile Tools: Appium, XCUI, Espresso, Android Debug Bridge (adb), Fastlane, Charles Proxy

Automation Frameworks: Robot Framework (custom library author), Playwright, Cypress, Cucumber

Languages/Scripting: Python, JavaScript, TypeScript, Java, Groovy, SQL, Scala

Manual Testing: Exploratory testing, regression, UAT, functional, integration, system, acceptance

Performance Testing: Gatling, Locust, load simulations in CI/CD pipelines

CI/CD & Infra: Jenkins, OpenShift, ArgoCD, AWS, Docker, Kubernetes, GitHub Actions

Domain: Fintech (GoPay), Streaming Media (Vidio), Banking (Jenius), EdTech (Ruangguru)

WORK EXPERIENCE

GoTo Financial (GoPay) | Jakarta, Indonesia · Fintech

Software Engineer in Test *Jan 2023 — Present*

- ▸ Own end-to-end mobile testing for GoPay's Android and iOS apps — Wallet Balance, Order History, User Summary, AI Recommendation, and User Transaction Statement features serving 30M+ users across Indonesia, Malaysia, and Singapore.
- ▸ Drive manual exploratory testing and automation coverage across mobile platforms — leading regression through final release sign-off for high-traffic financial features.
- ▸ Engineered mobile test coverage for GoPay's AI Recommendation engine — validating combinations against the recommendation model, ensuring accurate personalized suggestions reach 8M+ daily active users.
- ▸ Built the Crypto QA function from zero: established quality standards, authored automation processes, and managed ArgoCD-based release pipelines for the $10M GoPay Crypto product (mobile-first launch).
- ▸ Spearheaded regulatory compliance certification under CFX and Bappebti — making GoPay one of only seven licensed crypto operators in Indonesia, delivered in 11 months against a multi-year industry norm.

Vidio.com | Jakarta, Indonesia · Streaming Media

Test Engineer Team Lead *Dec 2018 — Oct 2021*

- ▸ Led the test engineering team owning mobile QA strategy across Android, iOS, and Smart TV for a streaming platform serving 45M+ MAU and 5M+ paid subscribers — sustaining 90%+ test coverage across all four mobile surfaces.
- ▸ Architected Indonesia's first internally-controlled mobile device farm — writing custom Python services for infrared sensor control, STB and Android TV orchestration, and embedded system automation, solving multi-device mobile testing at scale where Appium and Selenium offered zero coverage.
- ▸ Built custom Robot Framework libraries and FastAPI-based mock services to simulate payment flows, user sessions, and third-party integrations across mobile staging environments, enabling reliable end-to-end mobile testing without external dependencies.
- ▸ Integrated OCR technology into the Robot Framework pipeline via a custom-built Python library — enabling UI validation on Smart TV platforms with no standard accessibility APIs (a common challenge in mobile/embedded testing).
- ▸ Mentored junior QA engineers on mobile testing best practices, device farm operation, and cross-platform test case design.

Ruangguru | Jakarta, Indonesia · EdTech

Software Engineer in Test *Oct 2021 — Jan 2023*

▸ Architected and shipped a production-grade low-code test automation platform (Node.js, Playwright, Prisma) — adopted by 50+ engineers across QA and product teams, scaling test coverage from 85% to 97% across 1,000+ test cases on mobile and web platforms serving 53M+ students.

▸ Designed and operated a Kubernetes cluster for distributed mobile test execution — enabling parallel automation at scale across mobile devices and emulators.

▸ Built custom Python libraries extending Robot Framework's capabilities for mobile-specific test scenarios and deployed FastAPI-based internal services to simulate payment flows across mobile staging environments.

▸ Built a Python-based performance testing suite and maintained Locust-driven load simulations across critical mobile user journeys — fully integrated into Jenkins CI/CD pipelines.

Bank Indonesia (Central Bank of Indonesia) | Jakarta, Indonesia · Central Bank

Quality Assurance *Aug 2018 — Dec 2018*

▸ Served as core UAT tester for Indonesia's national pilot of QRIS (Quick Response Code Indonesian Standard) — validating data accuracy and secure integration across participating banks ahead of wide-scale nationwide mobile payment deployment.

▸ Executed comprehensive manual testing and UAT for Bank Indonesia's internal bank-to-bank transfer infrastructure — validating newly developed modules against complex financial compliance and business logic.

Jenius (SMBC Bank) | Jakarta, Indonesia · Digital Banking

FullStack Developer *Jan 2018 — Apr 2018*

▸ Engineered frontend architecture for Jenius, Indonesia's first digital banking application (mobile-first design) — built with React.js under strict Test-Driven Development (TDD) methodology for mission-critical mobile banking services.

▸ Implemented a comprehensive testing strategy spanning unit testing (Jest), API mocking (Axios-Moxios), and cross-layer coverage (Sinon, Mocha, Chai, Karma JS) — achieving 98% across core mobile banking modules.

EDUCATION

Jenderal Soedirman University *2012 - 2016*

Bachelor of Software Engineering — GPA 3.51
