# NOORMAN YULIZAR PRABOWO

## AUTOMATION QA ENGINEER — Python Specialist

noormanyulizarp@gmail.com | +6289634112503 | linkedin.com/in/noormanyulizarp

## PROFILE SUMMARY

Automation QA Engineer with 10 years of professional experience building test automation infrastructure in Python. Authored custom Robot Framework libraries, built FastAPI-based mock services for payment flow simulation, designed Locust-driven performance testing suites, and architected low-code automation platforms adopted by 50+ engineers. Hands-on with Python across test automation, performance engineering, and service mock creation — comfortable scaling coverage from 85% to 97% across 1,000+ test cases on platforms serving 53M+ users.

## CORE SKILLS

**Python (primary):** FastAPI, Robot Framework (custom library author), Locust, PyTest, Python-based performance/load suites, custom mock services, OCR integration

**Automation Frameworks:** Robot Framework, Playwright, Cypress, Cucumber, RestAssured, Appium, Selenium, XCUI

**Performance Engineering:** Locust (Python), Gatling (Scala), custom Python load suites, Jenkins CI integration

**Backend & Infra:** FastAPI, Node.js, Prisma, Docker, Kubernetes, AWS, GCP, ArgoCD, Jenkins, OpenShift

**Languages:** Python (expert), JavaScript/TypeScript, Java, Groovy, SQL, PSQL, Scala

**Mobile Testing:** Appium, XCUI, Espresso, Android, iOS, Smart TV (device farm)

**CI/CD:** Jenkins, OpenShift, ArgoCD, GitHub Actions, Docker, Kubernetes

**APIs & Protocols:** REST, gRPC, GraphQL, WebSockets, FastAPI mocks

## WORK EXPERIENCE

**GoTo Financial (GoPay)** | Jakarta, Indonesia · Fintech

**Software Engineer in Test** *Jan 2023 — Present*

- ▸ Designed and maintained Python-based test infrastructure for financial services serving 30M+ users across Indonesia, Malaysia, and Singapore — covering API automation (Java, TestNG, Cucumber, RestAssured, gRPC) and Python-based performance testing.
- ▸ Engineered test coverage for GoPay's AI Recommendation engine — combinatorial test generation in Python, validation pipelines for 8M+ daily active users, and regression gates integrated into CI.
- ▸ Built the Crypto QA function from zero: established quality standards, authored Python automation processes, and managed ArgoCD-based release pipelines for the $10M GoPay Crypto product.
- ▸ Spearheaded regulatory compliance certification under CFX and Bappebti — delivered in 11 months against a multi-year industry norm using parallelized Python-based test certification work.
- ▸ Operate observability stack (Grafana, Redis) for test infrastructure monitoring and Python-based anomaly detection in test results.

**Ruangguru** | Jakarta, Indonesia · EdTech

**Software Engineer in Test** *Oct 2021 — Jan 2023*

- ▸ Built custom Python libraries extending Robot Framework's capabilities — deployed as production-grade automation tools used by 50+ engineers across QA and product teams on a platform serving 53M+ students.
- ▸ Architected and shipped a production-grade low-code test automation platform (Node.js, Playwright, Prisma) adopted by 50+ engineers — scaling test coverage from 85% to 97% across 1,000+ test cases.
- ▸ Deployed FastAPI-based Python services to simulate payment flows across staging and production-mirrored mock environments — accelerating test cycle turnaround for payment-critical features.
- ▸ Designed and operated a Kubernetes cluster for distributed Python-based test execution — enabling parallel automation at scale.
- ▸ Built a Python-based performance testing suite and maintained Locust-driven load simulations across critical user journeys — fully integrated into Jenkins CI/CD pipelines for continuous performance validation.

**Vidio.com** | Jakarta, Indonesia · Streaming Media

**Test Engineer Team Lead** *Dec 2018 — Oct 2021*

- ▸ Architected Indonesia's first internally-controlled TV device farm — writing custom Python services for infrared sensor control, STB and Android TV orchestration, and embedded system automation where Appium and Selenium offered zero coverage.
- ▸ Built custom Robot Framework libraries in Python and FastAPI-based mock services to simulate payment flows, user sessions, and third-party integrations across staging environments — enabling reliable end-to-end testing without external dependencies.
- ▸ Integrated OCR technology into the Robot Framework pipeline via a custom-built Python library — enabling UI validation on TV platforms with no standard accessibility APIs.
- ▸ Led the test engineering team owning Python-based QA strategy across Web, iOS, Android, and Smart TV for a streaming platform serving 45M+ MAU and 5M+ paid subscribers.

## EDUCATION

**Jenderal Soedirman University** *2012 - 2016*

*Bachelor of Software Engineering* — GPA 3.51
