# NOORMAN YULIZAR PRABOWO

## SENIOR SOFTWARE QA ENGINEER — EdTech, AI-Powered Testing & Automation

noormanyulizarp@gmail.com | +6289634112503 | linkedin.com/in/noormanyulizarp

## PROFILE SUMMARY

Senior Software QA Engineer with 10 years of professional experience spanning test automation engineering, manual testing depth, and AI-augmented QA tooling. Direct EdTech domain experience from Ruangguru (53M+ students platform) — where I architected a low-code Playwright automation platform adopted by 50+ engineers. Hands-on with AI-powered testing: RAG pipelines, custom MCP servers, multi-agent orchestration, vector databases (Chroma, Qdrant), and local LLM hosting (Ollama, MLX). Currently owns end-to-end quality for GoPay mobile apps (30M+ users across Indonesia, Malaysia, Singapore) and previously led test engineering team at Vidio.com (45M+ MAU streaming).

## CORE SKILLS

**AI-Powered QA Tooling:** RAG pipelines, custom MCP servers, multi-agent orchestration, vector DBs (Chroma, Qdrant), Ollama/MLX local LLM hosting, persistent context/memory for AI agents

**Automation Engineering:** Playwright (low-code platform author), Selenium, Robot Framework (custom library author), Cypress, Cucumber, RestAssured, TestNG, Appium, XCUI

**Languages:** Python (FastAPI, Robot Framework, Locust), Java (TestNG, Cucumber), JavaScript/TypeScript (Playwright, Node.js), Groovy, SQL, Scala

**Mobile Testing:** Appium, XCUI, Espresso, native iOS/Android testing, multi-device farm architecture, Smart TV (Tizen, webOS, Android TV)

**EdTech Domain:** Ruangguru 53M+ students platform experience — test plans, automation coverage, performance testing for student-facing learning features

**AI Test Workflow:** AI tools to generate/refine test scenarios, AI-assisted test script development and repair, AI defect identification, AI-driven test failure analysis

**CI/CD & Infra:** Jenkins, GitHub Actions, OpenShift, ArgoCD, Docker, Kubernetes, AWS, GCP

**Performance Testing:** Gatling (Scala), Locust (Python), load simulations in CI/CD pipelines

## WORK EXPERIENCE

**GoTo Financial (GoPay)** | Jakarta, Indonesia · Fintech

**Software Engineer in Test** *Jan 2023 — Present*

- ▸ Own end-to-end quality for GoPay's mobile apps (iOS and Android) — Wallet Balance, Order History, User Summary, AI Recommendation, User Transaction Statement features serving 30M+ users across Indonesia, Malaysia, and Singapore.
- ▸ Engineered test coverage for GoPay's AI Recommendation engine — combinatorial test generation, validation pipelines for 8M+ daily active users, AI-augmented test scenario generation using Python.
- ▸ Built the Crypto QA function from zero: established quality standards, authored automation processes, managed ArgoCD-based release pipelines for the $10M GoPay Crypto product (CFX/Bappebti licensed).
- ▸ Spearheaded regulatory compliance certification — delivered in 11 months against a multi-year industry norm using parallelized AI-assisted test certification work.

**Ruangguru** | Jakarta, Indonesia · EdTech

**Software Engineer in Test** *Oct 2021 — Jan 2023*

- ▸ Architected and shipped a production-grade low-code test automation platform (Node.js, Playwright, Prisma) adopted by 50+ engineers across QA and product teams — scaling test coverage from 85% to 97% across 1,000+ test cases on a platform serving 53M+ students. Direct EdTech domain experience matching BeED's LMS ecosystem.
- ▸ Built custom Python libraries extending Robot Framework's capabilities and deployed FastAPI-based internal services to simulate payment flows across staging and production-mirrored mock environments.
- ▸ Designed and operated a Kubernetes cluster for distributed test execution — enabling parallel automation at scale across mobile and web platforms for student-facing learning features.

▸ Built a Python-based performance testing suite with Locust-driven load simulations across critical user journeys — fully integrated into Jenkins CI/CD pipelines for continuous performance validation.

**Vidio.com** | Jakarta, Indonesia · Streaming Media

**Test Engineer Team Lead** *Dec 2018 — Oct 2021*

▸ Led the test engineering team owning QA strategy across Web, iOS, Android, and Smart TV for a streaming platform serving 45M+ MAU and 5M+ paid subscribers — sustaining 90%+ test coverage across all four mobile surfaces.

▸ Architected Indonesia's first internally-controlled TV device farm — custom Python services for infrared sensor control, STB and Android TV orchestration, embedded system automation.

▸ Built custom Robot Framework libraries in Python and FastAPI-based mock services to simulate payment flows, user sessions, and third-party integrations.

▸ Mentored junior QA engineers on test automation, mobile testing, and AI-assisted test scenario generation — comfortable being senior peer or mentor to existing QA team members.

## EDUCATION

**Jenderal Soedirman University** *2012 - 2016*

*Bachelor of Software Engineering* — GPA 3.51
