NOORMAN YULIZAR PRABOWO

SENIOR QUALITY ENGINEER — Streaming, TV Platforms & AI-Augmented QA

noormanyulizarp@gmail.com | +6289634112503 | linkedin.com/in/noormanyulizarp

PROFILE SUMMARY

Senior Quality Engineer with 10 years of professional experience spanning manual testing, automation engineering, and AI-augmented QA tooling. Deep domain expertise in streaming media (Vidio.com — 45M+ MAU, 5M+ paid subscribers) and TV platform testing (architected Indonesia's first internally-controlled TV device farm). Hands-on with Python as primary language, AI/LLM tooling (RAG pipelines, custom MCP servers, vector databases), and software development background across React.js, PHP, and FastAPI. Currently owns end-to-end quality for GoPay financial features across iOS, Android, and web — serving 30M+ users.

CORE SKILLS

Mobile Testing (iOS+Android): Appium, XCUI, Espresso, native iOS/Android, multi-device, multi-screen-size, multi-OS-version

TV & Streaming Platforms: Smart TV, STB, embedded device testing, TV device farm architecture, Media Players, audio/video streaming

Manual Testing: Exploratory, regression, UAT, functional, integration, system, acceptance — native mobile + TV + web

Python (primary): FastAPI, Robot Framework custom libraries, Locust performance suites, custom mock services, OCR integration, embedded system automation

AI-Augmented QA Tooling: RAG pipelines, custom MCP servers, multi-agent orchestration, vector DBs (Chroma, Qdrant), Ollama/MLX, persistent context/memory for AI agents

Automation Frameworks: Playwright (low-code platform author), Selenium, Robot Framework, Cypress, Cucumber, RestAssured, TestNG

Languages: Python (expert), JavaScript/TypeScript, Java, Groovy, SQL, PSQL, Scala, PHP

Software Development: React.js, Vue.js, Remix.js, Prisma DB, MySQL, PostgreSQL, FastAPI backend services (FullStack background)

CI/CD & Infra: Docker, Kubernetes, Jenkins, OpenShift, ArgoCD, AWS, GCP, GitHub Actions

WORK EXPERIENCE

GoTo Financial (GoPay) | Jakarta, Indonesia · Fintech

Software Engineer in Test *Jan 2023 — Present*

- ▸ Own end-to-end manual testing and automation for GoPay's native iOS and Android apps — Wallet Balance, Order History, User Summary, AI Recommendation, and User Transaction Statement features serving 30M+ users across Indonesia, Malaysia, and Singapore.
- ▸ Test across multiple device sizes, screen densities, and OS versions (Android 8-14, iOS 13-17) — sustaining release sign-off quality for high-traffic financial features.
- ▸ Engineered test coverage for GoPay's AI Recommendation engine — combinatorial test generation, validation pipelines for 8M+ daily active users, regression gates integrated into CI.
- ▸ Built the Crypto QA function from zero: established quality standards, authored Python automation processes, and managed ArgoCD-based release pipelines for the $10M GoPay Crypto product.
- ▸ Operate observability stack (Grafana, Redis) for test infrastructure monitoring and Python-based anomaly detection in test results.

Ruangguru | Jakarta, Indonesia · EdTech

Software Engineer in Test *Oct 2021 — Jan 2023*

- ▸ Built custom Python libraries extending Robot Framework's capabilities — deployed as production-grade automation tools used by 50+ engineers on a platform serving 53M+ students.
- ▸ Architected and shipped a production-grade low-code test automation platform (Node.js, Playwright, Prisma) — adopted by 50+ engineers across QA and product teams, scaling test coverage from 85% to 97% across 1,000+ test cases.

▸ Deployed FastAPI-based Python services to simulate payment flows across staging and production-mirrored mock environments — accelerating test cycle turnaround for payment-critical features.

▸ Designed and operated a Kubernetes cluster for distributed Python-based test execution — enabling parallel automation at scale across mobile and web platforms.

▸ Built a Python-based performance testing suite with Locust-driven load simulations across critical user journeys — fully integrated into Jenkins CI/CD pipelines.

Vidio.com | Jakarta, Indonesia · Streaming Media

Test Engineer Team Lead *Dec 2018 — Oct 2021*

▸ Led the test engineering team owning QA strategy across Web, iOS, Android, and Smart TV for a streaming platform serving 45M+ MAU and 5M+ paid subscribers — sustaining 90%+ test coverage across all four surfaces. Direct domain experience with streaming audio/video and Media Players.

▸ Architected Indonesia's first internally-controlled TV device farm — writing custom Python services for infrared sensor control, STB and Android TV orchestration, and embedded system automation, solving multi-device testing at scale where Appium and Selenium offered zero coverage.

▸ Owned testing across multiple device types, screen sizes, and OS versions for Smart TV platforms (Tizen, webOS, Android TV) — directly matching TV platform focus.

▸ Built custom Robot Framework libraries in Python and FastAPI-based mock services to simulate payment flows, user sessions, and third-party integrations across staging environments.

▸ Integrated OCR technology into the Robot Framework pipeline via a custom-built Python library — enabling UI validation on TV platforms with no standard accessibility APIs (computer vision for QA).

▸ Mentored junior QA engineers on mobile and TV testing best practices, device farm operation, and cross-platform test case design.

Bank Indonesia (Central Bank of Indonesia) | Jakarta, Indonesia · Central Bank

Quality Assurance *Aug 2018 — Dec 2018*

▸ Served as core UAT tester for Indonesia's national pilot of QRIS (Quick Response Code Indonesian Standard) — validating data accuracy and secure integration across participating banks ahead of nationwide mobile payment deployment.

▸ Executed comprehensive manual testing and UAT for Bank Indonesia's internal bank-to-bank transfer infrastructure — validating newly developed modules against complex financial compliance and business logic.

Jenius (SMBC Bank) | Jakarta, Indonesia · Digital Banking

FullStack Developer *Jan 2018 — Apr 2018*

▸ Engineered frontend architecture for Jenius, Indonesia's first digital banking application — built with React.js under strict Test-Driven Development (TDD) methodology for mission-critical mobile-first banking services.

▸ Implemented a comprehensive testing strategy spanning unit testing (Jest), API mocking (Axios-Moxios), and cross-layer coverage (Sinon, Mocha, Chai, Karma JS) — achieving 98% across core banking modules.

Docotel | Jakarta, Indonesia · Software House

FullStack Developer *Oct 2016 — Jan 2018*

▸ Designed and developed full-stack web applications using PHP (Yii 1/2) and Vue.js for multiple client projects — establishing early software development background that complements QA engineering work.

▸ Owned backend logic and relational database architecture (PHP + MySQL), translating business requirements into scalable software solutions across diverse client domains.

EDUCATION

Jenderal Soedirman University *2012 - 2016*

Bachelor of Software Engineering — GPA 3.51
