NOORMAN YULIZAR PRABOWO

AUTOMATION QA ENGINEER — Selenium & Playwright Specialist

noormanyulizarp@gmail.com | +6289634112503 | linkedin.com/in/noormanyulizarp

PROFILE SUMMARY

Automation QA Engineer with 10 years of professional experience building test automation infrastructure with Selenium and Playwright. Architected a production-grade low-code automation platform on Playwright (adopted by 50+ engineers, scaling coverage 85% → 97% across 1,000+ test cases). Hands-on with Selenium since 2014, Robot Framework + Selenium custom libraries, and modern Playwright (TypeScript/JavaScript) for cross-browser and cross-platform automation. Operated distributed test execution on Kubernetes for platforms serving 53M+ users.

CORE SKILLS

Playwright (primary): TypeScript, JavaScript, low-code platform architecture, cross-browser, API testing, trace viewer, fixtures

Selenium: Selenium WebDriver (Java, Python), Selenium Grid, Page Object Model, cross-browser testing

Automation Frameworks: Playwright, Selenium, Robot Framework (custom library author), Cypress, Cucumber, TestNG, RestAssured, Appium

Languages: TypeScript, JavaScript, Python, Java, Groovy, SQL, Scala

Test Architecture: Low-code platforms, parallel test orchestration, distributed execution on Kubernetes, framework design

CI/CD & Infra: Jenkins, OpenShift, ArgoCD, GitHub Actions, Docker, Kubernetes, AWS, GCP

Performance Testing: Gatling (Scala), Locust (Python), load simulations

Mobile Testing: Appium, XCUI, Espresso (complementary to web automation)

WORK EXPERIENCE

GoTo Financial (GoPay) | Jakarta, Indonesia · Fintech

Software Engineer in Test *Jan 2023 — Present*

- ▸ Designed and maintained test automation infrastructure for financial services serving 30M+ users — covering API automation (Java, TestNG, Cucumber, RestAssured, gRPC) and web automation with modern frameworks including Playwright and Selenium.
- ▸ Engineered test coverage for GoPay's AI Recommendation engine — combinatorial test generation, validation pipelines for 8M+ daily active users, and regression gates in CI using modern web automation frameworks.
- ▸ Owned release engineering for the $10M GoPay Crypto product — ArgoCD-based release pipelines with full regression automation across web and mobile web surfaces.
- ▸ Spearheaded regulatory compliance certification under CFX and Bappebti — delivered in 11 months against a multi-year industry norm.

Ruangguru | Jakarta, Indonesia · EdTech

Software Engineer in Test *Oct 2021 — Jan 2023*

- ▸ Architected and shipped a production-grade low-code test automation platform built on Playwright (Node.js, Playwright, Prisma) — adopted by 50+ engineers across QA and product teams, scaling test coverage from 85% to 97% across 1,000+ test cases on a platform serving 53M+ students.
- ▸ Designed and operated a Kubernetes cluster for distributed Playwright test execution — enabling parallel automation at scale and reducing average test cycle time across critical user journeys.
- ▸ Built custom Python libraries extending Robot Framework's capabilities and deployed FastAPI-based internal services to simulate payment flows across staging and production-mirrored mock environments.
- ▸ Built a Python-based performance testing suite with Locust-driven load simulations — fully integrated into Jenkins CI/CD pipelines for continuous performance validation alongside Playwright test runs.

Vidio.com | Jakarta, Indonesia · Streaming Media

Test Engineer Team Lead *Dec 2018 — Oct 2021*

▸ Led the test engineering team owning QA strategy with Selenium-based and Robot Framework automation across Web, iOS, Android, and Smart TV for a streaming platform serving 45M+ MAU and 5M+ paid subscribers — sustaining 90%+ test coverage.

▸ Built custom Robot Framework libraries (SeleniumLibrary extensions) and FastAPI-based mock services to simulate payment flows, user sessions, and third-party integrations across staging environments — enabling reliable end-to-end testing without external dependencies.

▸ Architected Indonesia's first internally-controlled TV device farm — writing custom Python services for infrared sensor control, STB and Android TV orchestration, where Selenium and Appium offered zero coverage.

▸ Integrated OCR technology into the Robot Framework + Selenium pipeline via a custom-built Python library — enabling UI validation on TV platforms with no standard accessibility APIs.

EDUCATION

Jenderal Soedirman University *2012 - 2016*

Bachelor of Software Engineering — GPA 3.51
